

Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, continues to be the best selling lift truck provider in the United States. This business has been situated out of Irvine, California for well over 40 years, offering a wide-ranging line of quality lift trucks. With a great reputation of durability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are built here.

All Toyota machinery and parts manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to constant progress, and its environmental methods. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70 percent less smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A. - Leading the Industry

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its commitment to construct high quality lift vehicles while providing first-rate client support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's leading lift truck dealer and is amongst the magazines prestigious World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other organizations and no other lift truck maker can match Toyota's history of protecting the environment while concurrently stimulating the economy. Environmental responsibility is a key characteristic of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more intricate 2010 emission standards. The end creation is a lift truck that produces 70 percent less smog forming emissions than the current Federal standards tolerate.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its commitment to the environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other natural causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift vehicles offer improved stability, visibility, output, ergonomics, and all the leading safety technology that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS", helps reduce the chance of incidents and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability senses various conditions that may lead to lateral volatility and possible lateral overturn. When one of those factors are detected, SAS instantaneously engages the Swing Lock Cylinder to steady the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also aids to avoid injuries or accidents while adding stability.

The SAS systems were originally used on the 7-Series internal combustion lift trucks which were put on the market in 1999. These systems helped drive Toyota into the lead for industry safety standards. Now, SAS is utilized on nearly every modern internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with compulsory worker training, overturn fatalities across all models have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% fall in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's standard of excellence reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help customers meet OSHA standard 1910.178. Training services, video tutorials and various resources, covering a broad scope of matters-from personal safety, to OSHA rules, to surface and load situations, are offered through the seller network.

Toyota has maintained a continuous existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and clients of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and finally a education center.

The NCC embodies Toyota's commitment to offering top-notch consumer service. TMHU's 68 sanctioned Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations right through the U.S, supply the most complete and inclusive customer service and support in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
